

Sumter Electric Membership Corporation
Outdoor Lighting Service
Schedule OL-10

Availability

Throughout the Corporation's service area from existing lines of adequate capacity. Mercury Vapor lighting fixtures are not available for new installations after July 1, 2008. High Pressure Sodium and Metal Halide lighting fixtures are not available for new installations after May 1, 2018.

Applicability

Applicable only under long-term contract (one year or more), for dusk to dawn lighting of member property by means of photoelectric-controlled, High-Intensity Discharge (HID) fixtures (including mercury vapor, high-pressure sodium, and metal halide), or Light-Emitting Diode (LED) fixtures, and poles conforming to the Corporation's specifications, subject to the established Service Rules and Regulations of the Corporation.

Monthly Rate:

- A. Fixture Rates – High Intensity Discharge (HID):
 (Prices are for fixtures only and do not include any pole charges. See Section C for pole charges.)

STPL40	40	Steel, Anchor Base	\$ 17.50	\$ 1800

Where an LED fixture has been installed and a non-refundable standard pole CIAC charge has been paid (as is typical for roadway and subdivision lighting being billed to a local government), the monthly pole charges shall be waived.

- D. The Corporation reserves the right to require a non-refundable contribution in aid of construction for fixtures and poles installed.
- E. Where it is necessary to install a transformer and secondary service to be used only for the outdoor lighting, then in addition to all other charges, a monthly charge of \$2.00 will be made except where the transformer provides power to LED lighting fixtures for a government or other entity with multiple roadway and/or subdivision lights.

¹ Existing pole heights are dependent upon distribution pole location. There is no charge when the fixture is mounted on an existing pole.

Sumter EMC
Outdoor Lighting Service
Schedule OL-10
Page 4

- F. Overhead service to lights will be provided up to a distance of 200 feet per fixture (averaged between all fixtures at premise). A non-refundable contribution in aid of construction of \$2.00 per foot will be charged for service distances over the allowed 200 feet per fixture. Where existing poles must be changed to accommodate the desired mounting height, a non-refundable contribution in aid of construction will be charged.
- G. Underground service to lights will be provided up to a distance of 100 feet per fixture (averaged between all fixtures at premise). A non-refundable contribution in aid of construction of \$2.70 per foot will be charged for service distances over the allowed 100 feet per fixture. Where obstructions such as sidewalks or paving exist, the member will be required to perform trenching or boring under the obstruction, install duct provided by the Corporation, back fill, and repair disturbed sidewalks or paving.
- H. Where a lighting system is installed on a single premise and the Corporation determines that sufficient economies of scale in the construction, operation, and maintenance of the system will be realized, the Corporation may waive the monthly pole and/or transformer charges, subject to the following conditions:
 - 1. The Corporation reserves the right to require a non-refundable contribution in aid of construction for fixtures and poles installed.
 - 2. The fixtures must be in close proximity to one another, so that an average of at least 10 fixtures is connected per secondary service.
- I. Where right-of-way obstructions exist, the member will be responsible for all right-of-way clearing, unless otherwise agreed to by the Corporation.
- J. Where the Corporation provides metered electric service for the member's other usage and the outdoor light is connected so that the power for operation of the light passes through that meter, for LED fixtures the Monthly Rate with Metered Energy charges in Section A above shall apply. Section B of the Conditions of Service stated below shall apply in addition to all other applicable provisions set forth herein.

Conditions of Service

- A. The Corporation shall furnish, install, operate, and maintain the outdoor lighting equipment, including lamp, fixture, bracket attachment, control device, poles, and service drop, electrically connected so that the power for operation of the light does not pass through the meter for the member's other usage, unless otherwise mutually agreed to by the member and the Corporation.
- B. The Corporation shall operate and maintain all outdoor lights billed in conjunction with metered service under Section I of the above Monthly Rate, and the poles thereto attached, as follows:

Sumter EMC
Outdoor Lighting Service
Schedule OL-10
Page 5

1. Lighting equipment and poles must be the property of the Corporation.
 2. Maintenance shall only be performed on the outdoor lighting equipment and poles to which that equipment is attached.
 3. Member-owned underground conduit and conductor used for the outdoor lighting system shall remain the property of the member, and the member shall be responsible for the proper operation and maintenance of such underground facilities.
 4. Upon failure of any member-owned underground facilities, should the member request that the Corporation replace those member-owned facilities with Corporation-owned facilities, the Corporation may charge the member a non-refundable contribution in aid of construction to cover the cost of that installation.
- C. The Corporation shall maintain the lighting equipment, including replacement of the photocell or other components, at no additional cost to the member, as soon as can reasonably be done after notification of Corporation by the member that service has been interrupted. However, the member shall reimburse the Corporation for the cost of any such maintenance work that is required because of vandalism.
- D. The lighting equipment shall remain the property of the Corporation, including poles installed when the member makes a non-refundable contribution in aid of construction. The member shall protect the lighting equipment from deliberate damage.
- E. The poles for support of the fixtures are to be:
1. Wood, metal, concrete, or composite poles of the Corporation's existing distribution system or extensions from the system, or
 2. Poles owned and installed by the member, conforming to standard RUS specifications and mutually satisfactory to both the member and the Corporation.
- F. The number and location of service points shall be as specified by the Corporation.
- G. A non-refundable contribution in aid of construction will be charged to cover any cost in excess of the cost of standard fixtures.
- H. Outdoor lighting service shall be provided only at locations that are accessible to Corporation trucks for servicing purposes. Also, the member shall allow authorized representatives of the Corporation to enter the member's premises and to trim trees and shrubs as necessary for maintenance of the lighting equipment and for removal of the lighting equipment upon termination of service under this schedule.

Terms of Payment

Sumter EMC
Outdoor Lighting Service
Schedule OL-10
Page 6

Bills are due when rendered monthly. In the event the current monthly bill is not paid by the due date, the bill becomes delinquent.

Term of Contract

The Corporation and the member shall execute an agreement for service for an original term of not less than twelve (12) months and continued thereafter until terminated by either party on thirty days written notice, but the Corporation may require a contract of original term up to five years.
